TOUCH 15

FIRST Plotter with voice guidance and integrated AIS transponder

Touch screen, integrated electronic charting system with built in wi-fi, AIS & voice guidance

Optional cockpit speaker for voice guidance

- ***15" Touch screen technology***
- ***Built in Class B AIS transponder and GPS***
- ***C-Map MAX Pro charting with auto chart updating***
- ***WiFi Internet Access***
- ***Voice Guidance***

TOUCH is Digital Yacht's latest generation of electronic navigation products utilising touch screen technology for finger tip control and easy operation. Touch the screen to zoom in and out and create a route, mark or waypoint just by tapping the screen. Press and hold, and an intuitive menu pops up. It is amazingly simple yet amazingly fast and powerful. You can customise the icons on your screen for the features and functions you use and layout the screen to suit your needs. Total flexibility and total simplicity.

TOUCH brings in some industry firsts such as a built in Class B AIS Transponder - you'll see a real time overlay of other vessels equipped with AIS on the chart screen plus they'll see you too! There's also built in wi-fi so the system can be used to access the internet or email whilst your within wi-fi coverage areas - for instance, in a port or marina.

TOUCH uses C-map MAX Pro electronic charting. Over 35000 electronic charts are stored in the TOUCH processor - ready for easy unlocking as required. With MAX Pro charting, you'll also get real time updates of Notice to Mariner information - all downloadable over the wi-fi connection.

What's more, TOUCH offers voice guidance. Clear, spoken commands of your key navigation data such as depth, bearing, course and speed information.

Pre-Release Information - Expected Delivery Date January 2009. Specifications may change without notice.

TPX1000 NAVIGATION PROCESSOR

The heart of a TOUCH navigation system is the TPX1000 navigation processor. It incorporates a powerful Intel Atom processor, high performance Class B AIS transponder and GPS plus built in wi-fi. It's simple to install and its embedded PC technology allows TOUCH to offer unbeatable screen redraw rates and powerful navigation functions with the reliability of an embedded system.

Chart Plotter New Features

C-Map MAX Pro Charting with wifi updates

C-Map MAX Pro charting with built in library of over 35000 global charts. Unlock wide or mega wide regions as required. Option to purchase or rent charts for a 4 month period. Unlock and update through built in wi-fi interface.

Display Data The Way You Want

TOUCH offers the most flexible user operation. Lay up the plotters screen as you wish with choice of data boxes, data fields and chart orientation in head up, course up or north up. Open multiple chart windows and tile them as you choose. It's a powerful yet intuitive interface.

Create Waypoints, Marks, Routes and Boundaries with One Touch

Creating a waypoint is as simple as selecting the function and tapping the screen. Label with a icon and name. There's an on screen keyboard and TOUCH systems are supplied with a compact, mini wired keyboard too for fast data entry. Build a route in seconds and open the Planbook page to review interleg bearing, distance and ETA.

Voice Navigation Guidance

TOUCH brings a world first with voice guidance. The user can select clear, spoken commands of vital navigation data such as depth, position, speed, course, bearing, cross track and ETA information repeated through a powerful 10W cockpit speaker.

Weather Data Too

Use the built in wi-fi capability to download free, animated GRIB weather data and overlay a weather data layer onto the charting display. Show pressure, wind and temperature information or subscribe to premium services from Clearpoint or Sirius

DIGITAL YACHT

INTEGRATED CLASS B AIS TRANSPONDER

TOUCH incorporates a Class B AIS transponder which not only overlays AIS targets onto the chart but transmits your position and boat details to other users too. Touch a target on the charting screen and you can get valuable anti collision data such as closest point of approach (CPA) and time to closest point of approach (TCPA). Call sign and MMSI data is also available so you can positively identify vessel.

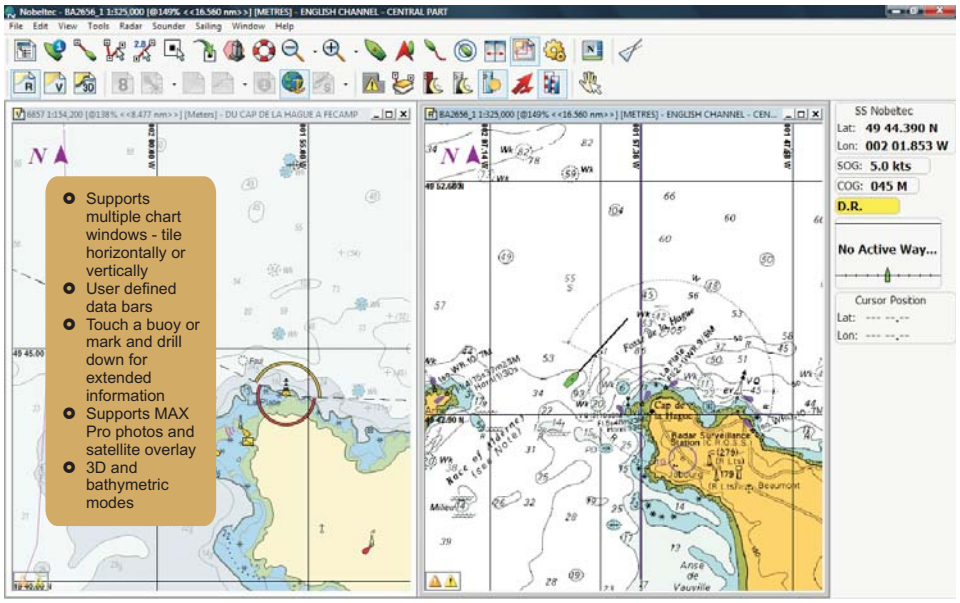

- See AIS targets overlaid onto TOUCH's detailed electronic charts
- Quickly view CPA and TCPA information
- Positively identify the vessel an see its track and heading
- Other AIS users see you too thanks to the built in AIS Class B transponder

TOUCH, TYPE OR CLICK - You Choose!

The touch screen is just one method of operating TOUCH. Every TOUCH system ships with a compact keyboard and mouse, with plug in remote panel. You can use this in tandem with the touch screen to suit your needs or plug in the optional Commander joystick or waterproof trackpad.

MULTIPLE CHART WINDOWS AND CHOICE OF DISPLAYS INCLUDING 3D

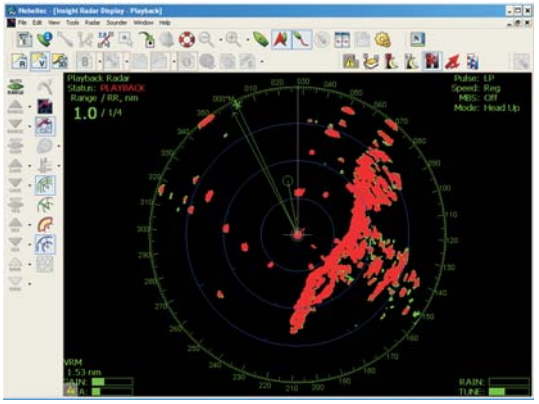

- Supports multiple chart windows - tile horizontally or vertically
- User defined data bars
- Touch a buoy or mark and drill down for extended information
- Supports MAX Pro photos and satellite overlay
- 3D and bathymetric modes

ADD RADAR AND SOUNDER OPTIONS FOR MULTI FUNCTION SYSTEM

Digital Yacht offer a range of radars to interface with the TPX1000. Users can choose from either full or split screen radar/plotters displays or a radar overlay with MARPA target tracking too. MARPA and overlay require a fast compass heading sensor for optimum results. Choose from 20" 2KW and 25" 4KW radome antennas or 4.5ft 4KW open array.
